Objective:

Software developer with a strong background in web, mobile, and backend systems, aiming to bring problem-solving skills and a committed work ethic to Ontario Power Generation. Seeking to contribute meaningful code and learn from industry leaders, with the goal of supporting and advancing OPG's technology initiatives.

Education:

- Advanced diploma in Computer Systems and Analysis from George Brown College (2021-2024).
 - Achieved Dean's List for the first year of education at George Brown College (3.5+ GPA).
 - High school diploma (2016-2020).
 - Achieved Honour Roll during each of the four years at high school (80%+ average grade).
 - Attended a Leadership Camp Program (2019).
-

Relevant Experience:

- Worked in full stack development across multiple different projects. This has resulted in me becoming familiar with programming in React, React Native, Python, JavaScript, Java, C#, HTML, Swift, and PHP. I am also comfortable writing database queries, specifically SQL, SQLite, and MongoDB.
- Participated in the yearly IEEEExtreme competition led by the IEEE. Worked for 24 hours with team members to complete complex problems and managed interpersonal conflicts which arose. Ranked in the top 20% in the IEEEExtreme 16.0, and top 18.5% in IEEEExtreme 17.0.

Volunteer Experience:

- President of the George Brown College Computer Science Club, 2023-present, Directing a large team and club members through honing computer science skills.
- Rotary Club Sunrise, 2018-present, worked in large teams organizing community events and leading other members resulting in successful events which ran smoothly.

Work Experience:

- Worked to lead the back of house at Her Father's Cider Bar + Kitchen. Operated under pressure and maintained composure under high stress. (2023)

Capabilities:

- Incredibly driven and enthusiastic to work, learn, and improve the environment for all co-workers.
- Capable of solving disputes with compromise and working civilly with co-workers.
